PROJECTS IN WHICH I HAVE WORKED

Netbanking Web Application

A web application developed in ASP.Net Core MVC, using the layered architecture pattern and Entity Framework as ORM.

Typing Test web Application

A web application to test typing skills. In it, tests can be made with different time settings (1, 2 and 3 minutes) in English and Spanish to test velocity and accuracy when typing on the keyboard. Developed in React Js + Tailwind as CSS Framework.

Social Media Web Application

A small social media called Gliskup App. Users can sign up, make posts, view posts from other users, react to those posts (with different reactions types), view own profile and other users profile, follow other users and other features. Developed in React JS + Tailwind with Redux and NodeJs with MongoDb.

Phone Book Application

A web application to manage a phone book. Contacts are stored in localStorage and their info can be read and edited. Developed in ReactJs + Tailwind.
